

AYUSH PAWAR

Data Analyst

Pune | +91 8103798011 | pawarayush498@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst and B.Tech Computer Science graduate with practical experience in SQL, Python, Power BI, Excel, PostgreSQL, and DAX. Skilled in querying databases, cleaning and transforming data, building KPI dashboards, and analyzing business problems through structured, data-driven approaches. Developed end-to-end analytics projects covering customer retention, revenue leakage, HR analytics, and dashboard reporting. Strong logical and analytical problem-solving ability, clear communication skills, and readiness to contribute to Data Analytics and Business Intelligence roles.

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Data Cleaning, Data Transformation, Exploratory Data Analysis, KPI Tracking, Feature Engineering, Data Validation

Visualization and BI: Power BI, Excel, DAX, Dashboard Development, Reporting

Databases: PostgreSQL

Libraries: Pandas, NumPy

Concepts: ETL, Data Modeling, Data Warehousing, Cohort Analysis, API Data Extraction, Business Intelligence, Problem Solving

INTERNSHIP EXPERIENCE

Deloitte (Forage)

Jul 2025 - Aug 2025

- Completed practical data analysis and forensic technology tasks, including telemetry analysis and operational insight generation.
- Built dashboard-based analytical outputs and interpreted machine downtime trends to support business decision-making.
- Strengthened understanding of data visualization, reporting, and business-focused analytics workflows.

Prodigy InfoTech

Aug 2025 - Sept 2025

- Worked on data cleaning, transformation, and analysis tasks using Excel, SQL, and Python.
- Prepared datasets for dashboard creation and reporting while applying validation checks for analysis readiness.
- Identified trends, summarized findings, and supported project-level decision-making through analytical reporting.

PROJECTS

Customer Retention and Revenue Leakage Analysis Tools: SQL, Power BI, Python, PostgreSQL, DAX

GitHub: <https://github.com/Ayushpawar09/saas-customer-retention-analysis>

Built an end-to-end SaaS analytics solution to identify \$2.3M in annual revenue leakage from churn, failed payments, and plan downgrades.

- Designed an 8-table PostgreSQL database with 152,000+ records and wrote 20 advanced SQL queries using CTEs, window functions, LAG, LEAD, RANK, and cohort analysis.
- Developed a 5-page interactive Power BI dashboard with 16+ DAX measures covering MRR, churn trends, customer health scoring, and at-risk customer action lists.
- Delivered 5 recommendations, including automated dunning workflows with an estimated \$680K annual recovery opportunity and customer health alerts to reduce churn by 15-20%.

Spotify Music Analytics Dashboard Tools: Power BI, DAX, Excel

- Analyzed 8,500+ Spotify track records to identify trends in popularity, genre performance, explicit content, and artist growth across decades.
- Built an interactive Power BI dashboard with filters for artist, genre, and explicit content to improve usability and real-time analysis.
- Developed DAX measures for KPIs such as total tracks, average popularity, maximum popularity, and average track duration.

HR Analytics Dashboard Tools: Power BI, DAX, Excel

- Built an HR analytics dashboard using 1,400+ employee records to analyze attrition, demographics, job roles, and salary distribution.
- Performed data cleaning, transformation, and KPI development to generate insights into employee retention and workforce patterns.
- Designed interactive dashboards supporting attrition analysis, workforce segmentation, and salary trend reporting.

EDUCATION

B.Tech in Computer Science Engineering, SAGE University, Indore

2022 - 2026

CGPA: 7.8
